What They Say

3D Printed Jet Engines!

<http://www.gereports.com/post/74545239240/ge-started-testing-next-gen-jet-engine-with-3d-printed>

3D Printed Clothing!

<http://www.dezeen.com/2013/03/07/3d-printed-dress-dita-von-teese-michael-schmidt-francis-bitonti/>

3D Printed *Scanty* Clothing!

<http://continuumfashion.com/N12.php>

3D Printed Guns!

<http://blog.solidconcepts.com/industry-highlights/worlds-first-3d-printed-metal-gun/>

3D Printed Food!

<http://www.naturalmachines.com/>

3D Printed ... uh ... Food!

<http://3dchef.nl/2014/04/10/eat-lead-in-my-case-you-can/>

3D Printed Kidneys!

<http://inhabitat.com/incredible-medical-advancement-as-scientists-produce-living-kidney-using-3d-printer/>

3D Printed Eyeballs!

3D Printed IP Infringement?

<https://www.thingiverse.com/tag:Yoda>

What They Don't Say

GE LEAP 3D Printed Fuel Nozzle

<http://www.gereports.com/post/80701924024/fit-to-print>

DLSM 3D Printing: Titanium Powder

<http://www.gereports.com/post/74545196348/joined-at-the-hip-where-the-3-d-printed-jet-engine>

3D Printing: Not Just Plastic Crap

“The gun is 45ACP.

It's rifled and the rifling was built directly into the part [...] using 3D Printing.

This gun has NOT
BEEN MACHINED.”

After guns are outlawed,
only machinists will have guns

<http://americanlongrifles.org/forum/index.php?topic=16823.0>

“Dress” ... With Manual Assembly

“The 3D-printed dress was then painstakingly polished and lacquered black, and then 12,000 black Swarovski crystals were hand applied ...”

Fully 3D Printed Kinematics Bodice

<http://n-e-r-v-o-u-s.com/blog/?p=4780>

Kinematics Bodice Element

<http://n-e-r-v-o-u-s.com/blog/?p=4780>

3D Printed Cellular Structures

(B) Retinal cell printing

Personal 3D Printing

<http://nos.twinsnd.co/>

What Is **Personal** 3D Printing?

- **You own the printer**
 - All the parts
 - All the hassle
- **You control the results**
 - Maybe the solid model, too
 - All the control parameters
- **No kit-building required**
 - Unless you prefer **DIY**

December 2010: Botacon Zero

- “First Annual”
 - This is typical...
- Terrific energy
 - In a lousy venue
- Pre-alpha printers
 - Show what you had
- Thing-O-Matic!
 - Announced September

Makerbot Thing-O-Matic

- “Super Cupcake”
 - All the upgrades
 - Plus *innovations*
- Seemed most stable
 - Of a motley assortment
 - Beware pre-alpha *anything*
- Arrived 24 Dec 2010

Thing-O-Matic 287

- Some innovations worked!
- Six months of redesign
 - Some not really needed
 - Most absolutely vital
 - Complete write-up
- State of the art when done
 - For mid-2011, anyway
- Now at Squidwrench
 - With all-new electronics

Makergear M2

- Everything worked!
 - Rigid frame
 - Good electronics
- Plus a few tweaks
 - Complete documentation
- State of the art
 - For mid-2013, anyway

Personal 3D Printing

- Building things with a hot-melt glue gun
 - A very **small** glue gun: nozzle 0.2 to 0.6 mm dia
 - A very **hot** glue gun: 190 to 230 °C = 350 to 450 °F

3D Printed IP Infringement

3D Systems has applied for patents for the following innovations and technologies:

- the rapid prototyping and manufacturing system and method
- radiation curable compositions useful in image projection systems
- compensation of actinic radiation intensity profiles for 3D modelers
- apparatus and method for cooling part cake in laser sintering
- radiation curable compositions useful in solid freeform fabrication systems
- apparatus for 3D printing using imaged layers
- compositions and methods for selective deposition modeling
- edge smoothness with low resolution projected images for use in solid imaging
- elevator and method for titling solid image build platform for reducing air entrapment and for build release
- selective deposition modeling methods for improved support-object interface
- region-based supports for parts produced by solid freeform fabrication
- additive manufacturing methods for improved curl control and sidewall quality
- support and build material and applications

3D Printed Food: Fail

Funding Unsuccessful This project's funding goal was not reached 2 days ago.

The Future of Personal 3D Printing

- Low end = Fused Filament
 - Friendly, cheap, **slow**
 - Barely good enough
- Retail = SLA Photopolymer
 - Razor + **Blade\$** business
 - Prosumer appeal
 - Low end will repeatedly fail
- Business = Laser Sinter
 - It's an industrial process!

Tchotchkes!
